

CODING & SOLUTION

Field	Details
Date	29/09/2026
Team ID	6ab7959e4c4a9ef0de66bbbee
Project Name	AI FitTrack API
Repository Link / URL	https://github.com/deepikam03/ai-fitrack-api
Programming Language(s)	JavaScript (Node.js backend)
Framework(s) Used	Express.js, Mongoose
Database	MongoDB
AI Integration	Google Gemini AI
Authentication	JWT, bcrypt.js
Key Features Implemented	User registration/login, JWT-protected APIs, workout CRUD, workout search, AI workout recommendations, AI fitness insights, centralized error handling, RESTful JSON APIs.
Pending / Incomplete Features	Not established from the supplied documentation alone; source-code execution/testing is required to verify implementation status.
Setup / Run Instructions	Install dependencies with npm; configure .env values including PORT, MONGO_URI, JWT_SECRET and GEMINI_API_KEY; start the backend with npm start.

Code Quality Checklist

S.No	Criteria	Status	Remarks
1	Code is modular and organized into functions / classes	Documented	MVC and modular layers are described.
2	Meaningful variable and function names are used	To verify	Requires source-code inspection.
3	Code includes comments / documentation where necessary	To verify	Inline comments not verified.
4	Error handling is implemented	Documented	Centralized error handling and validation are described.
5	Application runs without critical errors	To verify	Requires actual execution/testing.
6	Code is committed to version control	Yes	GitHub repository link is provided.

Additional Notes / Comments

The supplied project documentation describes a Node.js/Express REST backend using MongoDB/Mongoose, JWT authentication, bcrypt password hashing, and Google Gemini AI services.
